IS Gears

Back ground

Due to the recent focus on functional sofas (Head rest & Arm rest), the requirements for those parts have been gradually increasing.

In order to meet those requests, we have been utilized our original "fine gear" structure and finally developed our IS gears successfully.

Main Features

1. Ideal 6° degrees fine pitch reclining angle
2. Silent click gear
3. The most durable 210N·m(17% increased compared with our conventional model)
4. Secured by design: Complete protection for the mechanism inside
5. Easier to assemble with a universal design
6. Developed only for wooden frame sofa's reclining function

	IS gear
Thickness	14mm
Durability	210N·m
Pitch	6°
Cosmetics	Complete Symmetry
OEM	Possible for different motion patterns/steps
